

Online Resources of the Sherman Cohn Library: Using Tags and the Tag Cloud

--A video on this topic is coming soon--

Many resources are available from the Library's Diigo *tag cloud* which is located on the Library's Research Tools page on the Maryland University of Integrative Health's website. A shortcut link to this page is: <http://tinyurl.com/MUIH-Sherman-Cohn-Library/research-tools> Scroll down to the bottom of the page to view the tag cloud. It looks like this:

(view of Tag Cloud as of 8/22/13)

When working with our online tag cloud, each tag word or phrase is linked to one or more resources that are related to the tag name. Tags appearing larger signify those with the most resources. Tags that are smaller are linked to fewer materials. The resources that will appear when a tag is selected are those carefully chosen by the Sherman Cohn Library. Each link appears with an annotated passage explaining something about the resource.

Give it a try! Use your Internet Browser to open the URL <http://tinyurl.com/MUIH-Sherman-Cohn-Library/research-tools>. Scroll down to the tag cloud and click on the acupuncture tag. This will bring up an annotated list of links that may be of interest to acupuncture students (see image below). Within the group of links showing for acupuncture, a more specific subset can be created by clicking on the plus sign in the yellow box next to any tag in the “related tags” space on the right. For instance, clicking on the yellow plus sign next to article_resources will narrow the set of results to show only article resources for acupuncture students.

Click on any tag to view annotated resources relevant to its name. Use the plus sign in the yellow box next to a related tag to gain more specific results. It is that easy!

The screenshot shows a web browser window with the URL https://www.diigo.com/user/s_cohn_library/acupuncture. The page header includes the Diigo logo and navigation links: About | Blog | Twitter | Tools | Sign up | Sign in. The main content area is titled "Sherman Cohn Library's Library tagged acupuncture" and includes options to "View Popular" or "Search in Google". On the left, there is a sidebar with "Selected Tags" (acupuncture) and "Related Tags" (apa_citation_resources (6), article_resources (14), books_and_documents (8), chinese_herb (45), coaching (53), database (15), ejournals (6), fulltext (15), fulltext_some (6), government_information (5), health_data (6), herbal (74)). The main content area displays three search results:

- EBSCO (Authorized Users) AND please read annotation if off campus** (14 Nov 12)
Preview
Entry point to multiple databases on several different topics. OFF CAMPUS: Current students may gain access to EBSCO via the Library's Article Resources page on the Intranet (My MUIH) at: <http://intranet.tai.edu:8000/ArticleResources.aspx> Use your "@muih.edu" login and password to open the Article Resources page.
